

Environment

How important are efforts to enhance and protect the environment?

Residents in the Parish seem pretty 'green' in their outlook with recycling, energy saving and reducing litter as their top priorities. But when it comes to practicalities there are some conflicts for example, even if public transport were improved over 50% of residents wouldn't use it.

How do residents feel about efforts to protect the environment?

Limiting access to the countryside is not a solution for residents, but there is a desire for habitats and wildlife to be preserved. Self responsibility seems to be the underlying theme using information boards to educate.
