

Housing & Accommodation

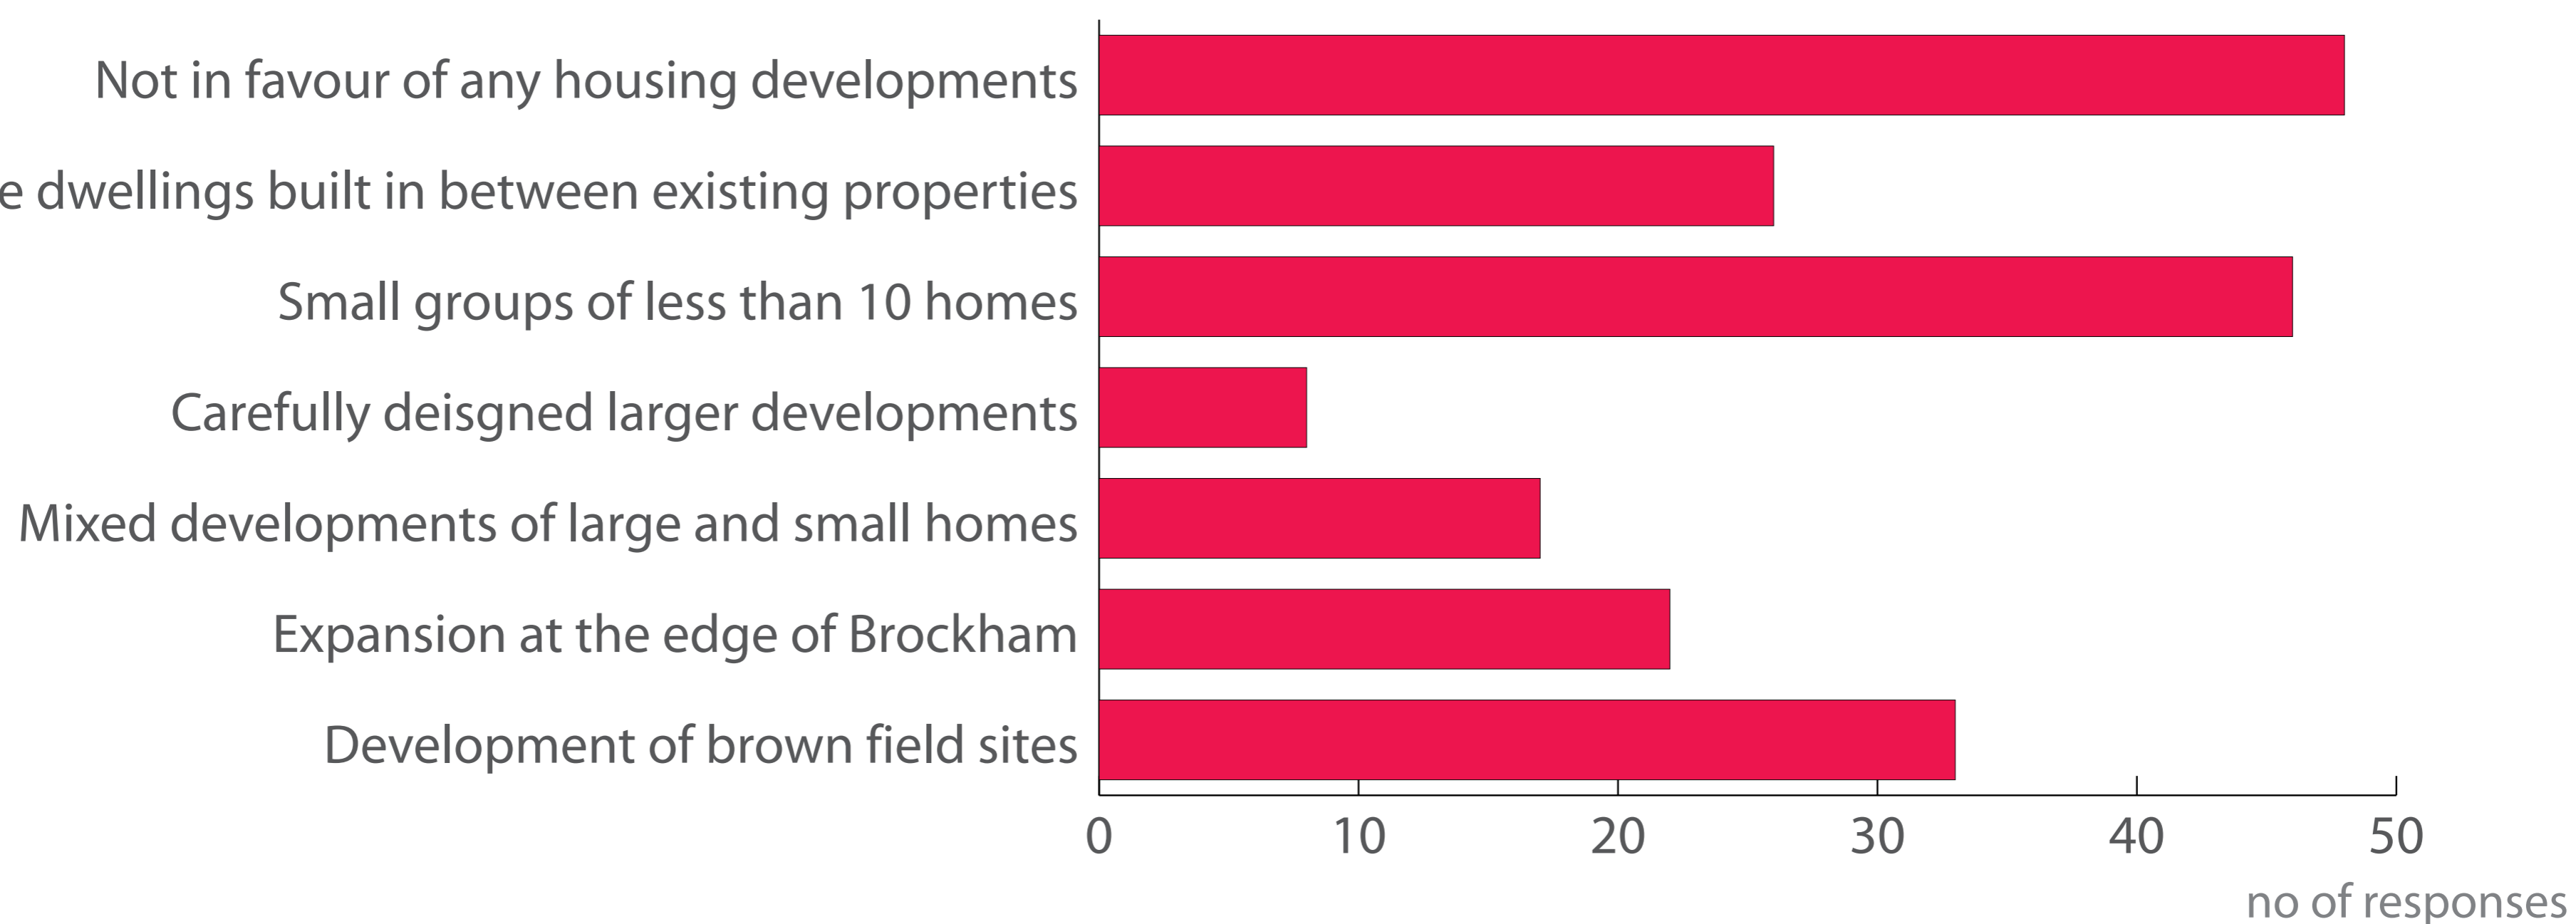

Does Brockham need more accommodation and if so what type?

There is a strong feeling that more accommodation is not needed in the Parish. However, twice as many people think that the Parish should have more affordable housing.

What type of developments would be acceptable to residents?

Although a considerable number of people are not in favour of further housing developments, many of you would accept small or individual developments, preferably on brown field sites.

Would residents have objections to a development to meet the housing needs of local people?

Not at all! Over 80% of residents in the Parish have no objections; although over 80% of these would want to see the scheme first... fair enough!
