

Information & Internet

How important are information sources to residents in the Parish?

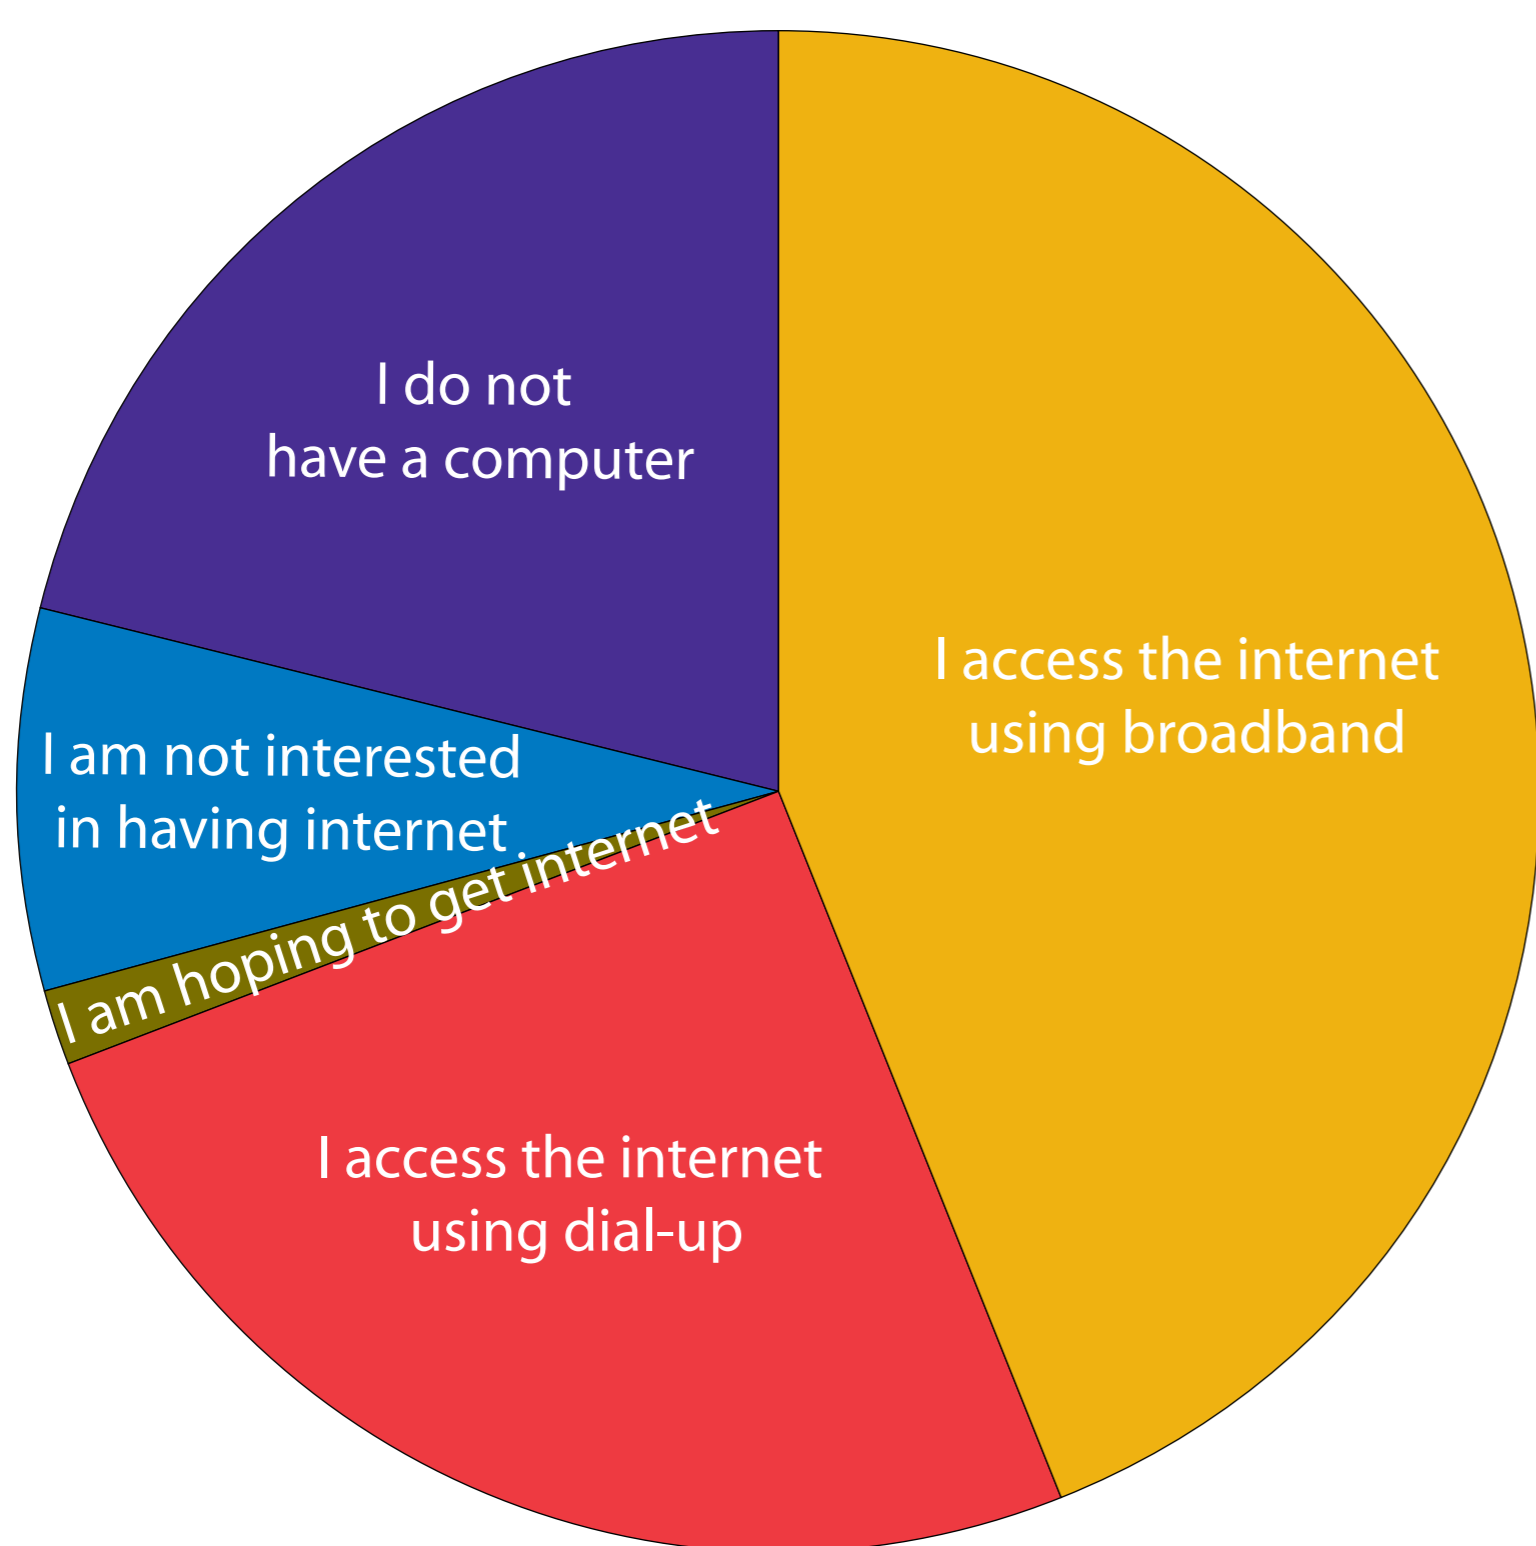

For most of us the Parish Magazine is by the most useful source of information, although the Dorking Advertiser comes a close second.

The web sites are pretty much neck and neck and both are still seen as more important than the Surrey Mirror.

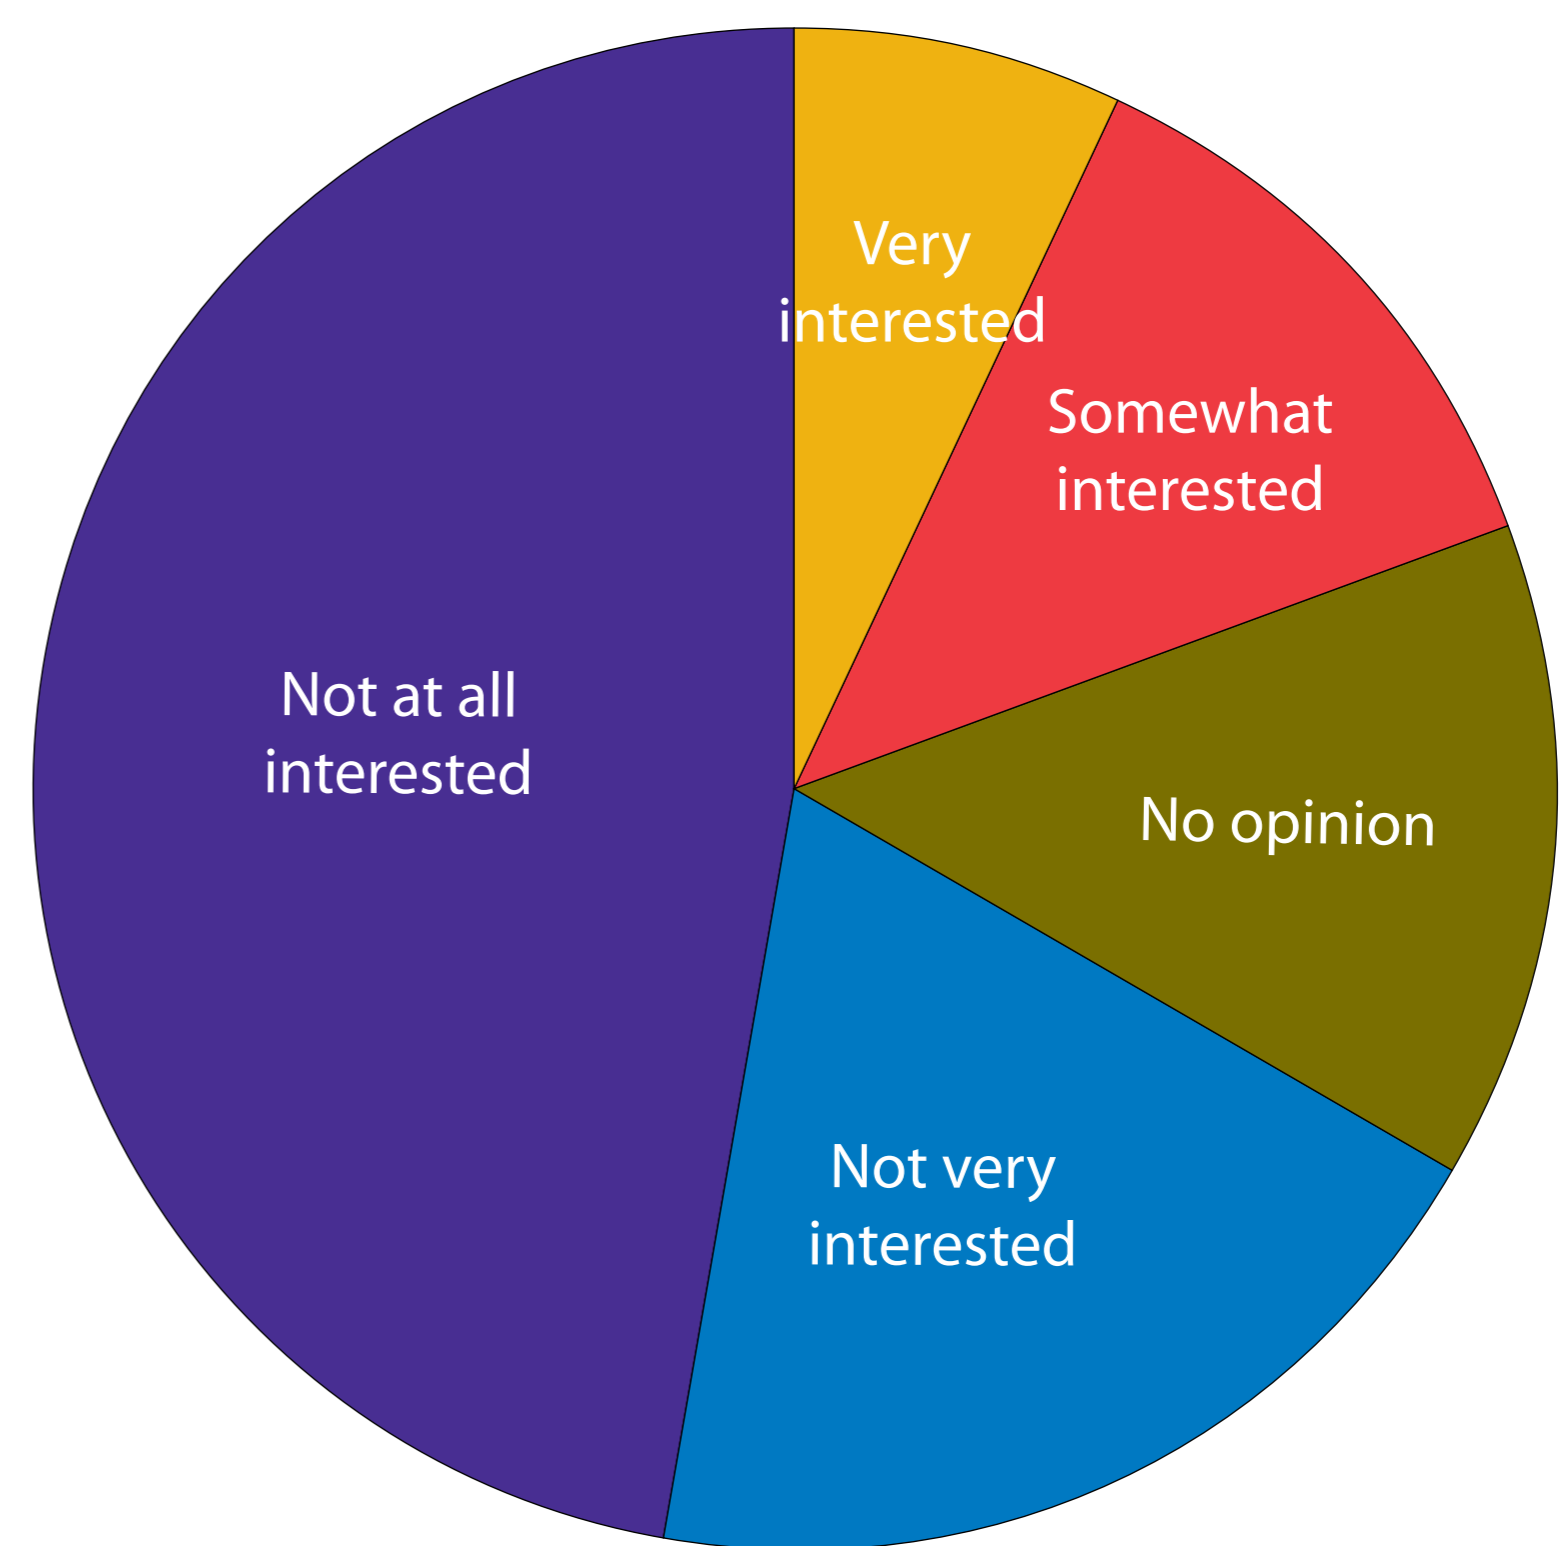

Are residents connected to the internet and do they want to be?

We are constantly bombarded with messages about broadband, wireless and multimedia and it appears well over half of us are indeed 'wired' - not only 'wired' but nearly half are connected via high speed broadband.
